Maths Homework 13.11.26

Adding Ones

This week the children have practiced following short steps to add single digit numbers to a starting number. They have first add an amount to take the starting number to the next round 10. Then they have added the rest of the amount.

For example

a. 35+8
b. 35+5+3
c. 35+5=40 (rounding 35 to the next 10)
d. 40+3=43 (adding the remainder of the number)

Can you practice following these steps with these sums?

1. 27+5
2. 46+6
3. 38+7
4. 56+9
5. 47+6

Challenge what could these missing numbers be?

4_ + _ = 54

4_ + _ = 54

4_ + _ = 54

4_ + _ = 54

Find some of the possible missing combinations.
