

## Year 3 Maths Homework

1. Circle the calculations which have an answer that is a multiple of 10.

$$10 \times 10 + 10 \times 6 =$$

$$16 \times 10 =$$

$$300 \div 10 =$$

$$120 \div 10 =$$

$$\_ \times 10 = 190$$

$$410 \div 10 =$$

$$\_ \times 10 = 200$$

$$250 \div 10 =$$

10 times the size  
of 14 =

VF

2. Match the statements to the correct answer.

61 multiplied by 10 is  
equal to...

it has 0 in the ones  
column as a place holder

There are \_\_\_\_ tens in  
940

82

820 is ten times bigger  
than...

610 as  $60 \times 10 = 600$  and  $1 \times 10 = 10$

I know 450 is a multiple  
of 10 because...

94

VF

3. Zarg loves food mazes. He needs to make his way through the food maze eating only multiples of 10. Zarg can move forwards, up or down but not backwards. He must eat more than 5 and less than 9 numbers before he reaches the exit.

start

110	75	200	570
320	140	350	480
55	90	83	160
790	340	20	910
16	285	470	300

exit

Find at least one possible way for Zarg to reach the exit.
