

Please use the questions as a guide. The children do not need to have the questions printed out and can complete them directly in their homework books.

The questions each week will act as revision of the skills and methods the children have already worked on at school.

Which of the calculations below are incorrect?

A. $12 \times (6 - 4) = 68$

B. $16 + 9 \times 7 = 79$

C. $14 + 8 \div (2 \times 2) = 11$

D. $11 + 18 \div 6 = 14$

Complete the statements below using $<$, $>$ or $=$.

A. $24 + 8 \times 3$ $12 \times (6 - 2)$

B. $12 \div 2 \times (4 + 6)$ $12 \times 8 \div 2$

C. $16 + 4 \times 3$ $4 \times 7 + (9 - 2)$

D. $(99 - 66) \div 11$ $12 \times 9 - 20$

Arrange the digit cards below to complete the calculation. Use each digit card once only.

$$\boxed{} \boxed{} + \boxed{} \div \boxed{} = \boxed{} \boxed{}$$

Explain how brackets could be added so that the calculation gives a different answer.
